

SDFC Project

Iteration 24

What went well	Votes
Planned user stories were completed in time.	9
Team is able to identify all the breaking JUnits, and able to fix it within time line .	8
Agile assessment went fine in time. We were able to show case what we did. Rally coach is happy with the way we r tracking the dependencies in rally.	6

What didnt go well	Votes
Due to code merge issue from upper stream we got one defect.	9
We did not get negative test cases from App support or other team. This will help to mitigate some risk in advance	6
we were not getting offers in the CERT environment. This may impact QA testing and may indirectly cause delay in accepting the user story	6
Sabre issue on Monday hampered testing activity. which forced us to move our environment from TSTS to CERT	6

Action items	Votes
The Flight Consolidation project is in progress that is causing lot of mismatch in Flight nos. in cert and TSTS. NO ETA on completion yet. Waj: Will follow up	2
Consolidate the list of issues in a daily basis with Request/ Responses wherever applicable and send it over to onsite.	2
