

SDFC- Iteration 19

Iteration Retrospective

What went well	Votes
Completed the development tasks on time with minimum defects	8

What didnt go well	Votes
Sabre slowness and server time out issues slow down the testing cycle.	7
SDS payment is inconsistent which impacted the testing .	5
Last minute meeting invites might cause issues to the team as some members have to stay late in the office	2

Action items	Votes
QA when reporting issues should distinction between defects and new change. The new change could be an item as a user story release backlog item.	4
we need to follow up to make the itkts payment more stable .	1
Check with iTKTs on how things work at their end. Their deployment cycle is causing the pattern and slowness of response.	0
