

SDFC

Iteration 25

What went well	Votes
Although we dont have much user story to work on in this iteration, team has done good job in analyzing and providing estimation on changes that is expected to come in near future	3
Planned user stories were completed in time.	3

What did not go well	Votes
Although we were ready to go with Code freeze on 19th July, due to change in external API, we have to postpone our code freeze.	3
Not getting expected ETA from Catalog on open issues.	2
we were not getting offers in the CERT environment. This may impact QA testing and may indirectly cause delay in overall project milestone	2

Action items	Votes
Due to Sabre issue, Flight initilization error, Testting activity got hampered	5
Waj: Continue to follow up with Program team.	
Consolidate the list of issues in a daily basis with Request/ Responses wherever applicable and send it over to all team members. This helped us to have proper followup	3
Try and test as much as possible to improve the quality of the product. Dependency is on the external systems being available and a major bo	0
