

# SDFC Project

Iteration 21

What went well	Votes
First package was delivered on time	2

What didnt go well	Votes
Most of the time CommonServices are down ----- Because of common services issues we are not able to deliver the second build ----- Ensure the CSsupports emails have the additional folks cc'ied Dema Gusa and Srinivas M.	4
Automation team not in Sync with functionality delivered.	2
Changes in requirement should be followed up with a screen flow documents. The defects 819 are due to the change in requirements	1

Action items	Votes
Have two cluster environments so the team can use one cluster for dev testing (Especially when we have issues with dev on CS)	2
A 30 minute session with automation team to review the functionality and have them on the communication of defects.	2
