SDFC Project

Iteration 23

What went well	Votes
Planned user stories were completed in time.	9
Infrastructure team open firewall to communicate Catalog QA environment from DEV. QA is stable compared to DEV.	9
Iteration 22, we got only two defects compared to the previous iteration. Shows improvement in the quality of coding.	8
Team is able to complete enabling alternate email at Gateside on all products. Initial plan was to complete SDFC first and then cater other	8
No code review comments for iteration 22 and only 2 comments on iteration 23	4

What didnt go well	Votes
Catalog is not giving any offer at the end of the iteration. This may impact QA testing and may indirectly cause delay in accepting the user story	3
Mexician countries were still not getting Merchandising offers.	2
Due the last moment change in external streams, SDFC code freeze moved from JUN to JULY	2
Due to known issue in catalog, we were not getting offers for MCLA countries. which was working fine before.	2

Action items	Votes
Try to spend additional time available for testing including negative test cases. Try to get CFC test vases from App Support. - WAJ	2
Follow up on open defects MCLA and Merchandising offers - Waj & Sheethal	2
Identify the external dependency defects in QC and add them to Rally as SPIKE items. - offshore	1
Catalog not returning offers need to be tracked in Rally. - Offshore team	1
